Thank you Karen. I’d rather just follow the advice of my doctor but I do appreciate that sentiment and I’m not being sarcastic.

Kim Bell McAll

Sean Moulton you keep bring up the polls. Why are you not sharing the history of the V? How the polio V hurt and killed many children. Because they did not do a 5-10 years study until it had the proper time frame as all V studies, which is 5-10 years. So tell me, in all your studies you keep talking about.

1. women’s reproductive ability?
2. Men’s reproductive ability?
3. Can it cause heart problems?
4. Can it cause cancer?
5. Can it cause organ failure?
6. Can it cause neurological disorder or problems?
7. Can it have reactions to any kind of medical prescriptions, prescribe from a doctor.
8. Does it have reactions to herbal remedies that many people use?

This is just a few questions, there are many more I am looking forward to hearing all your science on just these few questions.

year's it has. The vaccine we have has been in production since 2016 when they were looking at other common viral strains. So you have a vaccine that was in research for 5 years plus the human genome that was mapped since 2014 and the virus genome mapped since early Jan 2020. I’m sure if 10% they had the human genome mapped and out of technology this would be a most point.

Next they have studied this and 1 zero issue with severe reproductive issues. All studies done show nothing. And out of all the 1 zero issue studies this new vaccine shows no signs of them and they are on the plan. 2. There have been no issues with reproductive outcome for men and women can attest to that 3. The virus itself is self cause inflammation in the heart and other organs. And yes there are some unique cases in children however the score is so far apart from what the immune system do that it's not even looked at. 4. The vaccine is based on the MERS virus studies going back 2 decades to combat cancer. If you understood that cancer is when cells are mutated in most cases to cause this by environmental or other causes and you understand that the vaccine does not change the cells associated with the thing that it type three. Now have cancer. 5. Does death or organ failure linked to the vaccine, you do know that cause death and 6. There are no cause issues with allergic reactions in the MERS virus studies going back 2 decades to combat cancer. 7. The virus is linked to neurological issues but it does not enter the brain this has been shown before in past studies and even past vaccines do not enter nor affect neurological output. 8. Reactions can happen that's why you tell you doctor what medication you are on and they will tell you how can it react.

If you would have to see if there are any issues with herbal remedies. Based on how the vaccine can be for any drug to say it doesn't for herbal remedies would be in appropriate. All good questions. I'm myself and on drugs for a compensation due to chronic disease and I had similar questions and replied until the studies were done with patients who had similar issues. I was cautious myself and asking questions is never a bad thing.

Karen Pittman-Cook

Karen-Milling, these individuals don't want to hear about science and medicine behind the vaccines. They want to read about and believe in misinformation and conspiracy theories to make their decision to not vaccinate. Every person here has a story about a loved one or friend with medical issues who were vaccinated, and who have been told by their own medical doctors that those medical issues are completely unrelated to being vaccinated for covid, they don't believe their own medical doctors so why should they believe you?

Sean Moring

Sean Moring I’m not doing this to change their minds I do this bc if there is a few who read these and have questions then at least they will get some facts and slowly less people will believe the push out there bc someone took the time to just tell them the facts.

Karen Pittman-Cook

Karen-Milling, Hannah Pilling's story may interest you and your autistic child. She was awarded the highest amount ever due to a vaccine injury. I think she got $28M plus another $1M per year for life for her care? It's been awhile since I read the story but she got a catch-up round of varicella vaccine. Virtually overnight she went from being super active and sunny child to a virtually silent one, unable to make eye contact with a scan few vocabulary words with a diagnosis of autism. Her parents are both scientists of some sort, with their doctorates. Very intriguing case.

Sean Moring

Sean Moring Hannah was diagnosed with encephalopathy How it possible this came from cross contamination it's also it's from something else. That's why you have to be very careful when you say there is and is not life.

Michael Bronzetti

Sean Moring the creator of the vaccine has told the government that it should not be used as a vaccine. The government has told the people if they do not get it they will be in trouble and treated as second-class citizens.

Barbara Sharpe

Barbara Sharpe Sean-Milling can you show me the study that proves these statements to be accurate?

Kirsty DeJesse seeing as I believe over 220 million people in the USA alone have been vaccinated its a good thing that only hundreds have issues. Not to mention if you haven’t noticed no one has died of flu or natural causes in the past 2 years that being said 10% of those who died after getting vaccinated actually died of natural causes. Not saying all but most. Unless this vaccine protects us from the flu too.

This video is under two minutes, PLEASE watch this one. This is worth sharing, people should be alarmed.
Gabriel Logan: Stock ways.

Brian Bentley: Kimberly Dodd, I appreciate you doing so. I thought you were advocating the vaccine by expressing that it's incredible using that method. My trênk you for the kind reply.

Sean Monkey: To take right now there is causal link to adverse effects affecting motor functioning or activity with respect to brain. It's important to investigate all reactions and see what's causing these and trace it back to the actual cause.

Mark Sower DC: Janek Robbins: that's happened to my dad.

Silvia Lee: Max Wilshere is a guy I buy from in Vermont told me about a 10-year-old 63" 230 pound man who is a friend of his, that could pick up the average man with 1 hand. He is now paralyzed from the neck down after receiving the COVID vaccine."

Colleen Nelson Obrey

Lisa Smith

https://u.cen/oshowcowin.org

Telegram: Contact@oshowcowin.org

Wayne McGaugh: Kimberly Dodd: does it sound like something someone would get from being vaccinated against COVID?

Wayne McGaugh: Sean Mondry, who said "there is a causal link to adverse effects affecting motor functioning or activity with respect to brain function?"

Sarah Witten: Janek Robbins: I'm sorry to hear this. Please suggest them to research the possibility of recovery by taking low dosage of aspirin every day.

Parky Pain: Janek Robbins: Mercedes Grandy।।

Michael Milton: Wayne McGaugh, so you follow science and you have had both vaccines but you will need a booster shortly maybe a few more surely the science is telling you the vaccine is useless if you need a booster come on aton.

Rashika Lalitavala: What evidence do you want, when they don't call it evidence? They do not do scientific work They do not monitor their health status. Did they do brain scans (CT), heart echo, blood tests to confirm the claim of the 187 no evidence for this experiment?

Harmot Alle: Tilly Clough had please From here down.

Stephan Taylor: Janek Robbins: That seems unlikely. What would be the biological pathway for that to occur?

Stephan Taylor: Amanda Jolly: That is a potential Covid symptom, not a vaccine injury.

Stephan Taylor: Sean Shown: That's the obvious conclusion would jump to on hearing an implausible tale on the internet, "Well, you probably work for "(Heatl"

Stephan Taylor: Jaqueleen Carpenter Hayes: Kristen Dodd: other possible causes for all the coincidental same experiences in the same timeline definitely has to be other reasoning cannot possibly be the vaccine

Larry Corell: I went completely blind 3 minutes after vaccine. Thank god for this new app that helps you type by touch.

Wayne McGaugh: Gabriel Logan: I do not think I am "blind." I agree that people are getting sick and having all these medical issues, which they did before the vaccines. Adverse events are not caused by the vaccines. People already have these issues and are having them after the vaccines. People are being vaccinated to date, in the USA, that would be 392 million doses and 184 million people fully
Vaccinated. Please add to those numbers.

Wayne Sughth
Kim Kahnen Adams, don't enable by encouraging misinformation and conspiracy theories. His dad did not pass away as a result of being vaccinated for covid 19, no one has passed away as a result of being vaccinated for covid 19. These vaccines are safe and effective, and I challenge you to provide scientific evidence, or any other evidence, these testimonials are not evidence.
on Wed Like Reply More

Wayne Sughth
Steve Scott, why should any medical doctor lie? the answer is because they are not lying and all of these testimonials are from people who suffered from medical events (people suffered from medical events before the pandemic and vaccinations) and are completely unrelated to being vaccinated. If you have any scientific or medical evidence to support otherwise, please post it here.
on Wed Like Reply More

Wayne Sughth
Steve Scott, I respectfully disagree that it is not our business because you posted that your dad passed away as a result of being vaccinated for covid 19 and you opened the door for a reasonable question about what an altering or cornered stated was the immediate cause of his death and underlying associated causes of death. I still extend my sympathy for your loss, as I have lost both of my parents, but when you post on here something that is contradictory to what the CDC and NIH have stated it leaves investigation. You do not need to take offense as it was not meant to offend.

  Diet Lawrence OH YEAH, FEAR KILLS IF YOU HAVE NO CONTROL OF YOUR OWN FUTURE. SCARCE WILL NEVER PUT THE KEYO TO YOUR LIFE IN SOMEONE ELSE’S POCKET. PEOPLE BELIEVE IN FEAR & CONTROL. THAT NOW, YOU CAN& DESTROY THE FUTURE. DON’T BE FOOLED! IGNORANCE IS THE KEY TO CONTROL! PEOPLE CREATE LAW TO CONTROL AND AS AN EXCUSE TO GET AWAY WITH WRONG THINGS. IT IS A WAY TO CONTROL A AND TO DESTROY PEOPLE. THEY SAY THEY LOVE YOU ONLY TO FURTHER THIS OWN AGENDA. ONE THING GOD IS SURE NO ONE CAN USE THEM INTO HEAVEN. TRUE JUSTICE COMES FROM GOD. TAKE CARE OF YOUR OWN MIND, YOUR SPIRIT AND YOUR SOUL. THE DAY OF JUDGEMENT WILL COME, AND WE HAVE TO GIVE AN ACCOUNT FOR YOURSELF. Remeber the mind is a terrible thing to waste, but it can be controlled. Read continue to me in a sense of awareness. Be true to yourself. Stay close to your creator whom ever you perceive Him to be. READ THE BIBLE ON DESIDERATA ITS GOOD.

Lynda Brady Koch
The hospital in my hometown lump partially vaccinated into unvaccinated thus raising the percentages. Disgusting.

View previous replies:

Niki Wright
Lynda Brady Koch being happening everywhere. Before the vac, my friends, family was offered money to change cause of death on certificate from heartattack to covid.

Melissa Richard
Lyunn you know they aren’t the only hospital doing that. It helps the narrative. It’s sick!

Lyunn Brady Koch if someone gets covid less than 14 days after 2nd jab, they are considered unvaccinated.

Krisie Tay
Lyunn Brady Koch raising percentages of what? (vaccuum) Our hospital here keeps stats on partially and fully vaccinated. But would be good for them to separate out the “fully vaced” % & J also by numbers. Are you saying that is bad that the hospital is sharing fake numbers of who has received a vac? As in, more people are vaccinated than they say? Which yes – for sure is perplexing and misleading.
Mick Carigian: This needs to be reported to the VAERS and make sure you do a backup for your records if it was done.

Karen Elizabeth: No, but I lost loved one to the shot.

In memory of loved one

Karen Elizabeth: This case should be reported, side effects of any vaccines given to the VAERS. If you are vaccinated or unvaccinated, please report any side effects.

Wayne Slaglitch: while I think there are some negatives to vaccines, they are a great benefit. I have had many negative experiences with other treatments and medications.

Jenjel Bicht: We are the majority. We are the ones who are being harmed by these ‘vaccines’. The truth is that they are experimental, and we should be able to choose whether or not to receive them.

Leah Re: The closer we get to a world where the majority of people are vaccinated, the closer we get to a world where we have herd immunity and can prevent the spread of disease.

Jenjel Bicht: If you think vaccines are the only path to protection, you have not been captured by narrative warfare & you’re being played.

Leah Re: We need to work together to ensure that everyone has access to vaccines and that we are using evidence-based approaches to combat misinformation.

Jenjel Bicht: ‘Narrative warfare’ is nothing but whitehouse propaganda. Take this pandemic seriously because it is deadly, and you are not a medical professional or scientist. Get vaccinated now or you will beselling real-estate in Texas much longer.

Leah Re: We need to educate people about the importance of vaccines and the potential risks of not getting vaccinated.

Jenjel Bicht: You are irresponsible. Even your governor got vaccinated. Why do you suppose he did that???

Leah Re: It’s important to get vaccinated to protect yourself and others around you. It’s not just about personal health; it’s also about public health.

Jenjel Bicht: Why are you proud of people spreading misinformation and conspiracy theories?

Leah Re: It’s not just about personal health; it’s also about public health.

Wayne Slaglitch: I don’t sell real estate in Texas. I guess I see the level of epidemic negativity. Your inability to comprehend immunity has no bearing on my decision making. I listen to people around me and make an informed decision. If I don’t get vaccinated, I’m not a threat to anyone.

Jenjel Bicht: It’s not just about personal health; it’s also about public health.

Leah Re: It’s important to get vaccinated to protect yourself and others around you. It’s not just about personal health; it’s also about public health.

Jenjel Bicht: You need to use smaller words for them that? That’s why they are argumentative kinda cause they can’t comprehend why we do what we do!

Wayne Slaglitch: I can’t believe people are still spreading these conspiracy theories. This pandemic is real, and we need to take it seriously.

Leah Re: It’s important to get vaccinated to protect yourself and others around you. It’s not just about personal health; it’s also about public health.
Sherry Bear

I thought it was the only one that had the throat closing sensation, I went to my doctor which then referred to an allergist, she said it’s not severe and I can still talk breathe/swallow and said I should go ahead with the 2nd dose. I’m so conflicted.

Martha Turman: What is your sister’s medical diagnosis?
Sarah Williams: Martha Turman: how is your sister?
Karla Cunningham: Kim Taylor Fralic: Looks like there are some vaccinated stories to tell as well. WXZT-TV Channel 7, I double dog dare you to do a segment on them!
Sarah Field: There’s too much for just one segment. It needs to be a six-ep series.
Megan Chance Hodges: They’ll lose all funding being that pharma is the biggest fund to media sources.
Kim Taylor Fralic: Kim Taylor Fralic: You’re so right.
Ashley Daniels: Kim Taylor Fralic: they are cowardly puppets. Only report on what they are told. No truth whatsoever.
Fat Donkey: Kim Taylor Fralic: can someone have a Christian station that is privately owned do some reporting.

Megan Chance Hodges: Is that the same pharma that makes vaccines for polio, smallpox, and the others?
Kim Taylor Fralic: WXZT-TV Channel 7 won’t report on these stories, they are part of the problem.
Ashley Daniels: What is the truth? Where do you go for it?

Derrick Pauzon: My dad permanently lost sight in his Lath eye after being fully vaccinated.... You aren’t looking for these kind of stories?

Lauren Catherine Trigg: Derrick Pauzon: my Dad also lost his sight....
Lauren Catherine Trigg: Derrick Pauzon: Asthma? .....
Lauren Catherine Trigg: Tracey Lamb: multiple lost vision comments on this thread. Show Dad.
Derrick Pauzon: Lauren Catherine Trigg: his was Pfizer.
Derrick Pauzon: Lauren Catherine Trigg:: Vision loss from vaccines?
Derrick Pauzon: Lauren Catherine Trigg: he was Pfizer.
The man is less than 55, no diabetes, average weight, limited alcohol/ smoking for the past two years.
Lauren Catherine Trigg: Derrick Pauzon: I don’t smoke or drink as and sees no relation to getting his second jab on a Saturday and waking up blind on a Monday. I said with.
Brian Brosnan-Hemmen:...

My great aunt (very pro-vax) lost sight in her eye out of nowhere after getting the vaccine, too. Never had an issue with eyesight before in her life.

Derrick Pauzon: Lauren Catherine Trigg: sorry to hear that. I hurts to see them in such heavy denial.
Maury Reddinger: Brian Brosnan-Hemmen: what is her thought now
Keith Je: Derrick Pauzon: me too but my right eye (Modern)....
Brian Brosnan-Hemmen: Maury Reddinger: unfortunately, hard to believe as it is, she is in denial... even though a new health issue (including the common blood clots) seems to occur weekly.

Louis Isqvist: Derrick Pauzon: the case happened to my dad, but he didn’t want to hear any conspiracy theories. The doctors told him he had a tumor for a month... and then revealed he had a stroke.

Pat Taylor: Brian Taylor:...
Robert Fuller: Banned sedo the gene therapy shots polarize the red blood cells causing blood clots
Kelly Chandy: Etina: Jo how soon did that happen after your second shot?
Kristen White: Crystal Lynn Clark: Alejandro King-Kong:....

Kristen White: Mary Simpson: Alaka King: Kristen White YES
April Grantham: Derrick Pauzon: no, they aren’t looking for the truth....
Amu Mux: Derrick Pauzon: So did my mom’s friend. Blind in one eye. What country are you in?
Taaninging Mpho: well the way it is in [get it, asos] is that judgment for being so dumb. sorry for the blunt, cold hard truth. No plane, though, is this some horrible paradigm, why do so many people just ignorantly take this? IT’S THEIR OWN FAULT.

Kristen White: Derrick Pauzon report to VAO??
Linda Lye: Like Reply More
Wayne Nagash: Derrick Pauzon: Did his ophthalmologist say it was due to being vaccinated or something else?
Linda Lye: Like Reply More
Wayne Nagash: April Grantham: Why would they not be looking for the truth? What is their motivation?
Lisa Marie: Wayne’s motivation is to decrease the population, that way their future generations don’t have to go without renewable resources because they think we are using them all up. They think we are the evil. They also want to figure out how they can cheat death. You don’t really think they complain about “man-made climate change” only to make everyone live forever, do you? It’s only for them & we are just the experiment as they can see what works. This whole thing is nothing more than a biological medical experiment so they can figure out how THEY can live longer. They know most gaps bodies won’t tolerate it, & the few who do tolerate it will succumb more than anyone who died from it if they are the expendable lab rats. https://www.google.com/wwp/ www.rmi.com/temp/articles/looking-forward-to-the-end-of-humanity-1192625861

Mahala Sav-Monet
Saraia Patte Blanchard yes thank for bringing that up! I've been sitting back waiting for someone to bring up how they treat covid patients. CDC shows to use remdesivir (which they changed the name for) and they KNEW that this drug shuts down your organs days within treatment but they don't care nobodys talking about it because they probably don't know! They are trusting the data but the drug ispushing their OWN research!!

Melissa Kratzke
Melissa Kratzke: If everyone has it then it neutralizes the virus so it doesn’t cause disease and patients like it did with Delta and now a couple others. If everyone is vaccinated and all symptoms are minor then the vaccine is effective because the chance of severe illness is small. When people don’t vaccinate and don’t protect themselves then it’s more mistakes and we go back into restrictive measures.

Holly Pickens
Holly Pickens: It does not seem accurate. There are over 90% already of the flu virus but it is always evolving. Fever meds along with painkillers are being always being advanced by doctors so eventually we develop adaptation to them rendering them ineffective. The virus evolves and having everyone vaccinated will not solve anything unfortunately.
2 hrs. Like Reply More

Lucy Dwyer
Holly Pickens: Not everyone vaccinated for the flu. Only those with health conditions. So the flu has always had free reign to mutate and affect as it sees fit. The delta variant is the result of too many unvaccinated pushing it on, and going in to mutate. It is a living virus that constantly tries to overcome its obstacles. Younger people are being hospitalized, mostly unvaccinated but some vaccinated. This is the demographic that would never have been hit bad with the original strain. The whole point of vaccinating everyone is to stop it from evolving into something that nothing will stop. I wish people would understand that the virus reacts to everyone differently. The more people get vaccinated, the less the virus can attack the body and the less it’s going to mutate.

Kira Defy
Carrie Partain:
I sent you an inbox as you have it in case you wanna vent to a stranger. Sometimes it helps.

Wayne Shaygich
Brand Nicholas:
What was the diagnosis on her admission? What is the cause of death on her death certificate?

David Kunkle
Leigh Reid:
Are they drugging her with Remdesivir or Vancomycin? These drugs cause organ failures. The ventilator then kicks them off. Sad.

David Kunkle
Brand Nicholas:
Did they put her on a ventilator and drug her up with Remdesivir or Vancomycin? These drugs cause organ failures and the ventilator kicks them off. Hospitals get $$$ for doing such.

Brand Nicholas:
Wayne Shaygich:
They originally assumed covid because her oxygen levels were so low - test was negative. Then they assumed lung infection - her lungs were clear. Her heart was in AFib, she was disoriented, and unable to stand. Her AFib was uncontrollable with medication, and her heart was unable to oxygenate her body. She had inflammation and fluid on her heart and they again suspected infection. She was diagnosed with inflammation of the myocardium (LCM) and diagnosis with Myocarditis. She was treated for infection (I can't recall with what exactly), her heart was shocked once and they were unable to get it back to a steady beat. She coded the next day and they brought her to the ICU.

Her back, she coded again and died about an hour later. They told us her heart had just completely failed. I have not seen the death certificate.

Wayne Shaygich
Brand Nicholas:
How old was your grandmother, and did she have a history of heart disease? When do you see the death certificate to understand the cause of death and what underlying conditions leading to death. Sorry for your loss.

Amelia Fergas
Wayne Shaygich:
there's way too many injury/death cases here in these comments for these vaccines to be deemed safe. Can you imagine how many others, globally, have been injured or have died? Trying to prove this elderly person dead from an existing condition is a joke made.

Wayne Shaygich
Amelia Fergas:
The CDC and WHO determined that the vaccines are safe, and 183 million Americans are fully vaccinated. People died before getting the vaccine, people died after getting the vaccine, but there is absolutely no scientific evidence that people died from getting the vaccine. Where is the causal connection?

Brand Nicholas
Amelia Fergas:
I hate people who sole purpose of commenting is what... to disprove or question another person's loss. My grandmother was admitted only a week after getting the vaccine. She was admitted after a neighbor was called to check on her because she wasn't herself on the phone when my Aunt spoke to her... she hadn't eaten or bathed, she was weak and vomiting... she was placed in ICU where she remained for 3 weeks until her death. These people trying to prove a point are nothing more than a worthless excuses for human being.

Amelia Fergas

Lucy Flametop:
Nope. But I did lose my MM to the draconian lockdowns. She had advanced Alzheimer's and was locked away from us — her family, for 4 months. In her room. Alone. The room that she was in did not have direct sunlight. She couldn't see well enough to see us out the window and the window couldn't be opened to hear us. She developed failure to thrive and passed two days before Christmas last year. The governor and Fauci’s insane recommendations killed my loved one.

3 mins Like Reply More

Joana Rangel:
Lucy Flametop's LTC nurse here. We couldn't believe what they were making us do. The residents all felt their rights went out the window and they made us isolate these poor elderly people from their loved ones in their last days. It was heart breaking.

Loretta Loughlin: Did your grandpa's medical doctor say to him that it was due to the vaccine? If a medical doctor said that, your post belongs, otherwise it is misinformation.

Samantha Henderson: Tammy Grantham Montgomery: definitely have heard this one before. Healthy hard working 50-55 year old suddenly has onset dementia.

Loretta Loughlin: Wayne Duglith: It is not misinformation, it is a personal anecdote: one which may, or may not, be indicative of a pattern.

Loretta Loughlin: Wayne Duglith: It is not misinformation, it is a personal anecdote: one which may, or may not, be indicative of a pattern.

Vicky Wells: Well this didn’t go down the path you wanted. What a spectacular backfire that was. Thanks for making my morning brighter.

How about setting the TRUTH for a change, start with that.

Jenny Lynne: Tammy Grantham Montgomery: there is a team of doctors & virologists right now looking at brain diseases caused by the vaccine and they are saying that they hope they are wrong but it doesn’t look good. I’m sure as time progresses we’ll hear more of those.

Tammy Grantham Montgomery: Susan Thomas: I am so sorry. It probably was not dementia! The spike protein pass through the blood brain barrier or it’s virus, that’s why the docs are giving flu vaccine to block that, but if the vaccine the synthetic spike protein are doing the same thing. They don’t why some people don’t have issues and others do, but there has never been a vaccine that has such horrible side-effects.

Ti-Jo Edwards: Tammy Grantham Montgomery: sent you a DM.

Jen Shores: Tammy Grantham Montgomery: I know someone who had similar symptoms. Nothing PROOF.

Caryn Pandolph: Julie Smereck Powell: I’ve had the same thing.

Jennifer Lynne: Tammy Grantham Montgomery: there’s a team of doctors & virologists right now looking at brain diseases caused by the vaccine and they are saying that they hope they’re wrong but it doesn’t look good. I’m sure as time progresses we’ll hear more of those.

Tammy Grantham Montgomery: Jennifer Lynne: heard about that. It’s very scary.

Tammy Grantham Montgomery: Jess Sheets: can I message you?

Tammy Grantham Montgomery: Susan Thomas: what I mean is they are calling it dementia, but they are testing negative for it, but having the symptoms. You don’t develop dementia that rapidly. Look into Prion’s disease.

Tammy Grantham Montgomery: Susan Thomas: until am. So sorry for your loss.

Ti-Tangaba Sper: Lauren Ashley

Lauren Ashley: Ti-Tangaba Sper: Got it, I am starting to feel like maybe I was right!

Loretta Loughlin: Tammy Grantham Montgomery: Yeah, grandma went from getting up in the morning, showering, dressing, fixing breakfast for himself before we checked on him every morning. Got vaccinated, started falling a lot more, went to rehab and now requires round clock care. The difference is obvious to anyone who knows him before.

Loretta Loughlin: Tammy Grantham Montgomery: Loretta Loughlin: I am so sorry. This virus and the vaccine... They are both so horrible!

Wayne Duglith
Tara Wright McKee died after receiving the COVID-19 vaccine, and her family is demanding answers. People are sharing their experiences and concerns about the vaccine.

Rachel Brady: That's horrible and sadly it doesn't surprise me.

Tara Wright McKee, a victim of a rare complication following the COVID-19 vaccine, has inspired a global movement to raise awareness and demand safer vaccines.

The family of Tara Wright McKee is demanding answers after her death following the COVID-19 vaccine.

Sherie Morgan: I'm unvaccinated and in hospital with COVID. I must admit it's awful and was quite scary when I was brought in. There have been three other ladies in her who were very poorly and had been doubled jabs. Fortunately they all made a good recovery and have been discharged.

Liliana Shrap: I'm home now and resting but will be into purchasing these vitamins.
Sherri Morgan: Amanda Hayley they didn't and I'm now home thank goodness.

3 mins Like Reply More

Sherri Morgan: Wayne Douglas two reasons, no 1 I was advised not to by my neurosurgeon and no 2 I didn't want to. I doubt that I will be vaccinated at the moment in time.

3 mins Like Reply More

and Sarah Kim and Maree Graham, ya’ll are doing an awesome job here, supporting those injured and family members deathes need to be documented. I like to research & document too, I’ve got documents coming out of my ears on my & phone if – anyway I got a question on how y’all choose to report the names. I am going to say you post the info that you have, not the names, and if you can’t read the names too blurry if I can’t make out. Good job ladies, best of luck champ you needed info. Oh yes, please make sure all info is a profile that was mentioned. ....... Don’t give up, this is an incredibly hard time like some of these. I look for name cause there was another site ya’ll could use too. BSB, Party.

Cory Rose My wife Kelly Bailey, who was vaccinated, is not due to her being vaccinated, there is no causal connection. There is no evidence that she had been vaccinated.

Melissa Clark Lee I really don’t know how to respond to this. I mean, it’s a huge issue. I think you’re confusing the fridge thing with the fridge’s not being cold.

Wayne Biggert If you haven’t seen the reports of the FDA, they’re really not about the fridge not being cold. They’re about the vaccine not being effective.

Melissa Clark Lee I agree with you. I think we’re confusing the fridge thing with the fridge’s not being cold.

Wayne Biggert If you haven’t seen the reports of the FDA, they’re really not about the fridge not being cold. They’re about the vaccine not being effective.

Cory Rose Now, I’m not sure if that’s true, but I don’t think it’s because we don’t have a fridge. I think it’s because we don’t have a vaccine.

Wayne Biggert If you haven’t seen the reports of the FDA, they’re really not about the fridge not being cold. They’re about the vaccine not being effective.

Zagheira M: yes, I know Facebook is getting in trouble for posting fantasy. So, they delete nonsense before it infects others like you.

Barry Schneider

Barry Schneider, in your arrogance and ignorance you are destroying all you claim believe in. You use nonsense from idiots to support your positions as you claim experts with decades of experience “have an agenda”. The idiocy of this type of position is astounding. You’re killing America. You’re killing my friends and relatives. You’re killing children.

Wayne Dishy

Leslie K. Roberts: Not being vaccinated is playing Russian roulette.

Barry Schneider

Grindle Marie: you fantasy can be sickening. Try making up some good stories instead. People are laughing at you for swallowing this nonsense.

Barry Schneider

Grindle McDonald: now, delusion beggars more delusion. I can’t emphasize how weird and bizarre this page is. Stuff, made up or lied about and immediately accepted as “fact”- of has taken the imagination and blown it up to a party of theories and ideas that most people would simply reject by saying, “Americans don’t fall for typical communist propaganda”. And yet, the writers on this page prove Americans can be as stupid as anywhere else on this planet.

Wayne Dishy

Charles Ray Conolly: sorry, I can’t follow your logic or point. The rhetoric is way too deep for me.

Heather Deaton

Wayne Dishy: the 183,000,000 Americans who have been fully vaccinated are going to die? GET VACCINATED!

Heather Deaton

Wayne Dishy: no thanks!

Barry Schneider: my bad let me be plain and clear for the slow folks. You’re a lying fool, there’s no “70%” followers on this thread it’s a figment of your imagination, which I’m sure is large and unusual.

Wayne Dishy: Heather Deaton: Do the 183,000,000 Americans who have been fully vaccinated are going to die? GET VACCINATED!

Michael K. JW

Amy Davidson-Hutton: my friend mom had enterocolitis sepsis etc after the jab. Been in the ICU for a month

Sarah Janet Hyde

Michael K. JW: In did your problem happen after your vacs?

Sarah Janet Hyde: no, I didn’t

Wayne Dishy: Amy Davidson-Hutton: Did your husband’s medical doctor tell him you it was in any way related to being vaccinated?

Wayne Dishy: Lisa Matthews: You know there is no causal connection between small bowel obstructions and enterocolitis and the covid vaccine, and it is irresponsible of you to pass on that false info. As a mental health nurse, if you are, you are not supposed to be vaccinated for covid! Have you been vaccinated? Have you had a small bowel obstruction or sepsis? I hope you don’t mind, but I have sent a screen shot of your misinformation and conspiracy theory post to the administrator at Cooley.

Wayne Dishy: Amy Davidson-Hutton: Your friend mom’s enterocolitis sepsis was not caused by the covid vaccine. Enterocolitis may be caused by a variety of infectious agents including bacteria, viruses, fungi and parasites. It is often caused by eating or drinking contaminated foods. Bacterial agents include Salmonella, E. coli, and Shigella.

Wayne Dishy: They already ruled that out. I said what I said.
